

Professional Liability Root Causes of Loss Services

Zurich's construction risk engineers offer insights into professional liability causes of loss.

As one of the largest insurers of construction professional liability in the U.S., Zurich has acquired extensive claims experience over the years. Our dedicated risk engineers have spent time analyzing our claims data with the purpose of developing critical insights to help you manage your most challenging and unique construction industry risks.

These insights are now available to construction professional liability policyholders via a new risk engineering service — an in-person presentation that summarizes the root causes of loss within construction professional liability.

Presentation overview

The claims-driven, professional liability root causes of loss presentation:

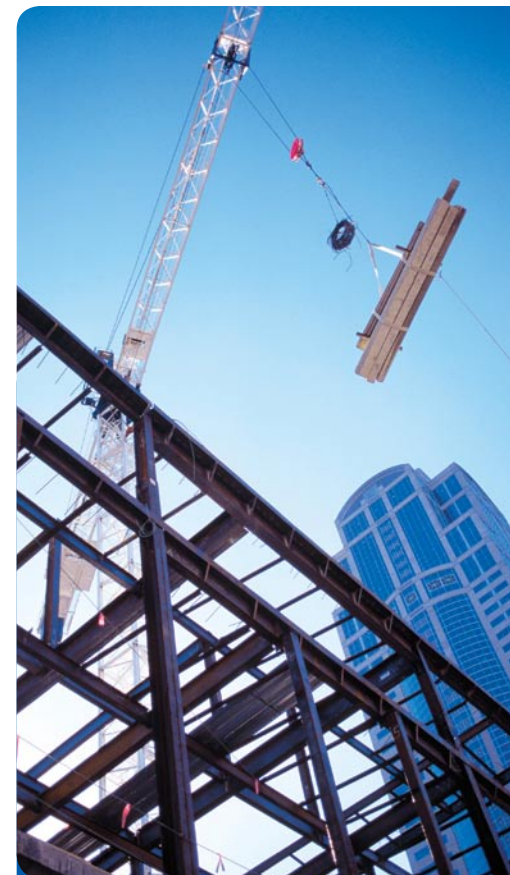

- Summarizes the experiences of over 100 large losses from 1994 to 2009
- Examines losses under contractor, designer and owner policies
- Covers a variety of project types, including:
 - Infrastructure
 - Commercial
 - Education
 - Health care
 - Manufacturing
 - Residential
- Provides claims-specific risk mitigation strategies

Zurich's risk engineers also discuss the root causes of loss and technical trends, including delay damages, structural failure and construction defects.

Additional risk engineering services

Zurich offers a variety of other services to help customers manage construction professional liability risks, including:

- Risk mitigation plans
- Lessons learned case studies
- Sub-consultant prequalification
- Managing material substitutions
- Contract review and risk management assistance
