

Virtual Consulting

What if safety personnel could instantly access the collective knowledge of hundreds of risk engineering professionals?

Zurich's Virtual Consulting system provides construction managers and their job site supervisors with on-line consulting that identifies exposures common to most operations.

The detailed information explains how to reduce the risk of each exposure; and provides access to tools and information to assist in implementing new, or modifying existing, programs to address these risks.

The challenge

Many contractors operate multiple, remote job sites. Because a corporate safety director cannot be on-site at all times, responsibility for safety is often delegated to a production employee with limited knowledge of job site safety. This individual may need immediate access to professional safety information which identifies potential causes of loss and offers real-world solutions.

The solution

Zurich Services Corporation's Virtual Consulting provides innovative risk engineering solutions and services that can optimize operating performance and improve financial results. By providing customers with data-driven insights into loss exposures and helping them take action, Virtual Consulting generates tangible value — quickly and easily.

Virtual Consulting draws upon a compilation of millions of insurance claims in thousands of industries. Customized access isolates the information relevant to the customer's operations, presenting the most pertinent hazards and solutions.

Capabilities

The Virtual Consulting system provides immediate access to loss control tools and resources including:

- Primary industry hazards by SIC code
- Loss control strategies and best practices
- Technical information on industry risk topics
- Web-based text and video training
- Sample policies and procedures
- Links to other industry-specific web sites

Benefits

- Brings instant, industry-specific safety information to remote job sites
- Improves safety effectiveness of on-site supervisors through sophisticated online training
- Provides access to the collective knowledge of more than 1,500 risk engineering professionals worldwide

Service details

Current customers and producers may obtain access to a sample Virtual Consulting report by logging into www.zurichna.com/virtualconsulting.

Prospective customers can obtain additional information by e-mailing virtualconsulting@zurichna.com.
