

Zurich Seminar Series

The Zurich Seminar Series helps equip contractors with the skills needed to manage their risks by bringing industry-specific courses on subjects ranging from risk awareness and operational skills development, to strategic risk management training.

The challenge

The construction workforce in the US is aging. As millions of baby boomers move closer to retirement age, the industry will need to prepare for the impending shortage of skilled-workers and the need to keep employees in the workforce longer. It is estimated by 2030, people 55 and older will make up 40% of the adult population.¹

Given this aging workforce demographic and a pending shortage of construction workers, training is one significant strategy that can be used to reduce the potential impact.

The solution

Developed and delivered by Zurich Services Corporation, our seminars offer relevant, state-of-the-art programs that address important issues in the construction industry. Instructors with extensive knowledge of the construction industry present materials designed to develop participants' proficiency in identifying costly exposures and developing appropriate controls.

Examples of seminar topics include:

- Accident investigation techniques
- Aging workforce
- Construction defect
- Contractual risk transfer
- Crane safety including National Commission for the Certification of Crane Operators (NCCCCO) crane operator certification preparation
- Highway worker safety
- Managing the non-English speaking workforce
- Reducing vehicle exposures
- Return-to-work
- Rigging basics
- Soft tissue injury prevention

Construction executives and managers, risk managers, safety directors, superintendents, operation managers and other industry professionals can benefit from these seminars.

Seminar details

Zurich provides these seminars free of charge to their customers and offers:

- Seminars held at convenient locations throughout the U.S. – Over 170 sessions have been held to date with more than 3,450 participants from 1,240 companies
- High-quality training materials that participants can use long after the seminar
- Industry-related training developed through collaboration with customers, claims, risk engineering, underwriting, legal and regulatory agencies
- Instructors with industry-specific backgrounds

Customers may participate in as many seminars as they wish free of charge.
